

In week 3, we're learning about

honoring and respecting
wildlife in your area!

What Can You Do To Help and Respect Wildlife?

- Please don't feed or touch wild animals!
- Leave wild animals in the wild! Do not collect them in jars, tanks, etc.
- Leave flowers and plants in the wild, it is likely they provide housing or food for a wild animal.
- Pick up trash - wild animals often mistake trash for food.
- Only put trash cans out the day of trash pick-up, NOT the night before. Keep trash cans enclosed in a shed or garage or other enclosure that wildlife cannot access on non-trash days.
- Make sure there's nothing with an odor in your vehicle, including candy, gum, air fresheners, trash, lotions and lip balms.
- Don't store food of any kind in an unlocked garage, flimsy shed, or on or under your deck/porch.
- If an animal seems injured or needs help, visit AHNow.org to find an appropriate person that can help!

Challenge

Over the next week, see how many different species of animals you can observe in your area. From the smallest insects to the large bears, how many species can you count? You may be surprised how many you can find! Make it a game with your family or friends to see who can find the most. While you are searching, try to pick up 10 pieces of trash that animals could mistake as food!

Did You Know?

The average garden snail has around 14,000 teeth!

We'd love to see you completing the activities! If you would like, please share a picture of your wildlife discovery that we can share on social media! Please e-mail pictures to: zoologyfoundation@gmail.com
