

## Natural Art Project

It is time to show us your art skills! This week, we challenge you to create an art piece out of ONLY items found in nature! This could include leaves, sticks, rocks, pinecones, and more!

When completing your piece, please do not pick or tear off items that are still growing (e.g. flowers, branches, leaves). Instead, find items that may have fallen on the ground naturally so we are showing respect for the growing world.

Finally, after you have completed your project and sent us a picture, please leave the natural items where you found them. Since many animals rely on plant waste for food and shelter, leaving it behind will allow other species to enjoy your art as well!

**Show us your creativity!**  
**This week we are learning**  
**how to respect nature**  
**while enjoying its beauty!**

### Did You Know?

Art used to be an Olympic event! Between 1912 and 1948, medals were awarded for architecture, literature, music, painting, and sculpture!

We'd love to see you completing the activities! If you would like, please share a picture of your art piece so that we can share on social media! Please e-mail pictures to: [zoologyfoundation@gmail.com](mailto:zoologyfoundation@gmail.com)
