

# Conservation Challenges

- Make signs to post around your house to place over light switches to help remember to turn them off when not in use!
- Commit to using less single-use plastic! Try switching to reusable water bottles, straws, and shopping bags, say no to plastic utensils, and utilize reusable containers in place of sandwich baggies! There are many switches you can make!
- Add a timer next to your shower so you can take a shorter one and conserve water! Time your average shower time, then see if you can reduce the time. The average shower uses 2.5 gallons of water per minute.
- Start composting!
- Consider using less paper and paper products. Try to print less and store documents digitally, invest in cloth napkins and kitchen towels, and plan ways as a family where you can use less paper towels!

# ZoFo Connect

July 3, 2020

**This week, we're celebrating conservation!**  
**Conservation is the prevention of overuse and waste of resources.**

## Did You Know?

Scientists guess that our earth is more than 4.5 billion years old!

We'd love to see you completing the activities! If you would like, please share a picture of you completing one of the challenges in your house that we can share on social media! Please e-mail pictures to: [zoologyfoundation@gmail.com](mailto:zoologyfoundation@gmail.com)
