

# This week, we want you to experience the world as another species!

## Challenge

How would you live and feel if you were a cricket, a deer, a turtle, a whale? This week, choose one other animal species and try to spend 15 minutes living life as that species. Here are some suggestions and ideas to think about for this activity:

- How do I breathe?
- How and what do I eat and drink?
- Am I short or tall (try to position yourself where that species would be)?
- How do I move and how fast am I?
- Which senses are my strongest (if sight is weak, try closing your eyes, if hearing is weak, try covering your ears, etc.)?
- Where do I live and how do I get shelter?
- How do I feel in different types of weather?
- What kind of activities do I do?
- Do I like having others around me or do I prefer to be alone?
- How am I treated by humans?

**Empathy: The ability to share and understand the feelings of another**

### Did You Know?

There is an estimated 8.7 million species on earth, however only 1.2 have been discovered and catalogued!

We'd love to see you completing the activities! If you would like, please share a picture of you as another species that we can share on social media! Please e-mail pictures to: [zoologyfoundation@gmail.com](mailto:zoologyfoundation@gmail.com)
