

This week's activity is all about finding ways to reuse everyday items you may have at home instead of throwing them away!

Reuse Crafts

There are tons of ideas out there for finding old materials in your home and reusing them in a new way. The chances are if you're looking to get rid of something, there is some way you can reuse it. Here are a few ideas but we encourage you to find even more. For the ideas below, just google for instructions!

- Have a bunch of plastic grocery bags? Braid them together to make a jump rope!
- Have some old t-shirts? Create a reusable shopping bag or trendy tote!
- Have some old cans? Decorate them and create a fun bowling game or even add lights for a cute home decoration!
- Finished with your plastic cups or water bottles? Decorate them then use them as mini planters for flowers and herbs!
- Have a bunch of old CDs you no longer need? Cover them with fabric and create coasters!
- Have old fuzzy socks? Slip them on your swiffer to save money and help mop your floors!

July 24, 2020

By reusing items, you're reducing the need for more natural resources, and reducing air, land, and water pollution and waste.

Did You Know?

Americans make more than 200 million TONS of garbage each year. For reference, that is the weight equivalent of 28.5 million elephants or one million blue whales each year.

We'd love to see you completing the activities! If you would like, please share a picture of your recycled craft that we can share on social media! Please e-mail pictures to: zoologyfoundation@gmail.com
